FOR IMMEDIATE RELEASE

New Dallas-Based Life Management Clinic Opens its Doors

DALLAS, Texas, Sept. 15, 2009 —Oleng, a new weight loss and body sculpting clinic opened its doors today. The new clinic is [located](#) next to Northpark Mall at 7839 Park lane, Suite 120. Oleng offers clients a medically supervised [weight loss program](#) along with the latest technology in body sculpting and [cosmetic](#) enhancement.

The Oleng weight loss program is a four-step process with a **complete physical** and health review with the doctor. Each plan includes a body composition analysis giving detailed data on muscle mass, water weight and body fat percentage. Clients get an individualized diet plan from a **registered dietitian** based on that body composition analysis. Together with their personal coach, the client learns in detail how their body composition is changing – including if they are they losing water, muscle or fat.

With real knowledge comes real results. The Oleng concept focuses on actual fat loss and not just total weight. “The results are amazing when we focus on the real issues centered around obesity,” says Dr. Loc Trieu, Medical Director of Oleng.

To maximim cosmetic results Oleng offers a variety of medical treatments. “For example we have one procedure that can help clients burn 700 calories in one hour, said Paul Chellgren, President of Oleng. “Our cosmetic and laser specialists offer a full suite of treatments and procedures to attack fat and tighten, smooth and improve overall skin quality.”

Oleng provides the most current medical services including Botox, dermal fillers, laser skin tightening, Lipo lite, chemical peels, laser hair removal, foto facials and body wraps.
